FID/ABCB 270/63  
19 December 1963

MEMORANDUM FOR: Chief, Atomic/Biological/Chemical Division, OSI

ATTENTION: [REDACTED]

THRU: Chief, Requirements Branch, Reconnaissance Group, CGS

FROM: Chief, CIA/FID(NPIC)

SUBJECT: Analysis of Photography Submitted Over Trombay, India

REFERENCES: Requirement No. C-813-90,818  
CIA Project No. C 1683-63

1. This report is sent and annotated photo are being returned in accordance with the above referenced requirement.

2. The information available on the furnished photography was restricted by poor quality and limited coverage. The lack of camera data and fiducial marks precludes mensuration.

3. A large monitor roof building with a tall stack is a possible reactor and is located approximately 0.5 nautical miles (nm) northeast of the Canada-India Reactor. A study of ground photography indicates that the thorium plant and a reactor is located approximately 1.5 nm southeast of the possible reactor. No plutonium separation plant was observed.
